Professional Summary

Full Stack Developer with hands-on experience building production-grade web applications using the MERN stack and Next.js. Demonstrated ability to work in collaborative teams, implement scalable architectures, and solve complex technical challenges. Skilled in developing RESTful APIs, designing database schemas, and deploying cloud-based solutions. Seeking full-time software engineering opportunities to contribute to innovative projects.

Education

Manipal University Jaipur
B.Tech in Computer Science

July 2023 – May 2027
GPA: **9.33/10**

Aldrich Public School, Orai
Senior Secondary Examination

2021 – 2022
93.6%

Experience

CollegePur — UpliftAid (Nonprofit & Social Impact Platform)

March 2026 – May 2026

Full Stack Engineer | Next.js 15, React, TypeScript, Redux Toolkit, Tailwind CSS

- Built and scaled a **120+ page production-ready frontend** with dynamic routing and role-based authentication for 3 user types (donors, volunteers, admins)
- Reduced network requests by **60%** using **TanStack Query and Redux Toolkit** caching and implemented optimistic updates for improved UX
- Improved performance to **<2.5s** initial load time and **<100KB** JS bundle using code splitting and lazy loading
- Contributed **250+ commits** over an 8-week development cycle in a collaborative team environment
- Leveraged AI-assisted tools to accelerate development, debug issues, and refine application architecture

Projects

BAI | MERN Stack (MongoDB, Express, React, Node.js) [Live](#)

Dec 2025 – March 2026

- Developed a location-based service platform connecting households with domestic workers.
- Developed **RESTful APIs** and a real-time booking system with response time **<100ms**
- Implemented **geolocation search (2dsphere indexing)** for efficient nearby service discovery
- Integrated **Passport.js authentication** and **Cloudinary** supporting 10,000+ images
- Designed optimized database schemas supporting 25,000+ users and 500–1,000 concurrent users

BnB | Node.js, Express, MongoDB, EJS, Cloudinary, Passport.js [Live](#)

May 2025 – Sep 2025

- Developed a full-stack web application for property listings with complete CRUD functionality for listings and reviews.
- Implemented secure user **authentication and authorization** using Passport.js with session management (MongoDB).
- Designed and built 15+ RESTful API endpoints following MVC architecture to ensure scalability and maintainability.
- Designed server-side rendered (SSR) UI using EJS, enhancing initial load performance and SEO
- Enforced role-based access control (RBAC) ensuring only owners can modify listings and reviews

TrainIt | Node.js, Express.js, EJS, Axios [Live](#)

Aug 2025

- Built a platform to search and download datasets from sources like Hugging Face.
- Implemented backend API aggregation using Express.js and Axios; deployed on Render.

Technical Skills

Languages: Java, Python, C/C++, JavaScript, SQL, HTML, CSS

Core Concepts: Data Structures & Algorithms, OOP, Problem Solving, DBMS, SDLC

Frameworks: MERN Stack, Next.js, Django

Tools: AI assisted workflow, REST API, Axios, JWT, Git, Google Cloud, VS Code

Certifications

Programming in Java — NPTEL

Scored **75/100**, Top 5%

Jul – Oct 2024

Introduction to Operating Systems — NPTEL

Covered scheduling, memory management, synchronization

Jul – Sep 2025

Activities

Campus Ambassador — CodeFest'24, IIT (BHU)

Promoted hackathons and events; received Certificate of Appreciation

Nov – Dec 2024
